

HUGE thank you to Jennifer and Dayana for completing the Texas Regional Haze final action and getting the RA's and OAR's concurrence on the package
Thank you to Clovis and Karolina for continuing to make progress on addressing the Section 129 backlog.

Thank you to Bob for completing the first draft TSD for the Round 4 SO2 designations

Thanks to Clovis and others for pulling together the slides for the AEF presentation

Cindy Parker will celebrate her 30th anniversary of her in-service date on Thursday, June 18, 2020.

Thanks to Josh and Ruben for addressing the lead issues in OK while Mike was on leave.

Thanks to Ruben for reducing the number of FOIA records from 18,000+ to less than 600 by filtering out non-responsive documents and getting a mass designation for the bulk of the records!

Thanks to Suzy and Ellen for working with Adina and establishing a WIKI on the Air Monitoring TEAMS site for inputting weekly accomplishments.

Thanks to Ellen, Mark S, and William Puplampu (ORC) for reviewing and responding to the Controlled Correspondence for RA signature to address the Sierra Club's Petition for Reconsideration of our approval of TCEQ's 2019 ANP.

Thanks to Clarence for tracking down the invoices in RTP so we can pay Mesa Labs on time for the new equipment.

Thanks to Donnett for assisting with gathering the cost information for projecting use of Air and Radiation Program Funds.

Thanks to Mariama for keeping up with the bowling chart measures and employee ideas implemented for the Business Review meeting next week.

Thanks to Cindy, Mike, and Terrie for presenting the DERA briefing and educating David Garcia on all-things-DEA-competition.

Thanks to David, Suzy, Clarence, and Mark B for brainstorming on how to conduct a desk TSA as an option during COVID-19 travel restrictions to keep improving our monitoring network QA.

And thanks to Aunjane for coordinating the division RTOC report.

A big recognition for the entire staff in continuing to do their jobs and get deliverables out the door (examples: Monarch title V permit issued (Thanks to Bonnie, Cyndi, and ORC; Grant report closeouts and continuing to move Grant Awards through the IGMS system in the Air Monitoring & Grants Section; public noticing Title V Air Permit renewals for Laguna Compressor Station (Erica

LeDoux); continuing our work on TSAs to the degree we can accomplish without being in the field (Mark Berry, David Anderson, Suzy Apodaca); continuing State/local program oversight in both the Air Monitoring and Air Permits programs.

Major Accomplishments

The Final Texas BART FIP now in the Administrator's office for signature was a huge lift. Dayana, Jennifer and Michael really did a lot and we also got a lot of help from HQs.

Also Karolina's efforts to organize and plan to address our backlog of 111d and 129 actions has been a great.

All of the effort to get the Beaumont function redesignation proposed. It took calls with HQs and Texas to get Texas to withdraw the 1 hour portions and once a path was cleared, Jeff Riley quickly moved forward.

The final approval of the New Mexico/Albuquerque 2008 transport SIP was a great team effort that include some creative approaches to how to use modeling and pulling together information from Emissions Inventory and modeling experts to respond to comments Sherry, Erik, Bob and Nevine all were persistent in bringing this one home.

- Not only is Carl recognized by Superfund, as you will see in Wren's note. He is also recognized by HQs and R7 for helping them out in getting a quick review from the FR office of their Iowa notice regarding SSM. Carl's expertise and helpfulness in FR processing is going nationwide.
 - I want to convey the tremendous help that Carl Young has provided in guiding Brian Mueller and Mike Torres through the Federal Register notice requirements, related to our Tulsa Fuel and Manufacturing site deletion. He has been not only helpful, but quite pleasant to work with.

-
